Burlington, NC | mpaylor1998@gmail.com | (336) 212-6784 | [GitHub](#) | [LinkedIn](#)

SKILLS

Languages: Java, Kotlin, TypeScript, JavaScript, SQL, C#, C++, Python

Frontend: React, HTML, CSS, Android XML

Backend: Spring Boot, Spring Security, Node.js, REST APIs, JPA/Hibernate, JWT

Data and Infrastructure: PostgreSQL, Docker, Flyway, Microsoft Azure, Google Cloud

Tools: Git, GitHub, Android Studio, IntelliJ IDEA, Postman, Azure DevOps, Figma, Unity

PROFESSIONAL EXPERIENCE

GFiber

Durham, NC

Direct Sales Representative (Residential)

August 2025 – January 2026; April 2026 - Present

- Demonstrate strong communication, adaptability, and goal-oriented performance in a fast-paced sales environment.
- Build relationships with prospective customers by communicating the value of fiber internet and addressing their needs.

Textron Specialized Vehicles: E-Z-GO

Augusta, GA

Software Engineer I

July 2024 – August 2025

- Developed new Android user interfaces for next-generation products using Kotlin, Java, XML, and Android Studio.
- Translated Figma designs and product requirements into functional interfaces while supporting testing, debugging, and integration.
- Collaborated remotely with Android engineers in Romania through daily stand-ups, asynchronous communication, and cross-time-zone development.
- Served as the team's primary US-based Android developer while coordinating with embedded, server, and product teams.

Textron Specialized Vehicles: E-Z-GO – Internship

Augusta, GA

Software Engineer Intern

May 2023 – August 2023

- Developed and tested C# APIs that transferred data between databases and Azure-hosted services.
- Prototyped a GPS-tracking solution through API testing with Postman, ESP32 hardware research, and live software testing.

PROJECTS

[BloxBlueprint](#) – Full-Stack Application | *In Progress*

2026 - Present

React, TypeScript, Spring Boot, PostgreSQL, Docker

- Develop a full-stack planning platform that helps Roblox developers organize game components, functions, tasks, releases, and monetization features.
- Design REST APIs and relational data models using Spring Boot, JPA/Hibernate, PostgreSQL, and Flyway.
- Implement a responsive React and TypeScript frontend with JWT-based authentication secured through Spring Security.

Multiplayer FPS Video Game with Integrated AI – *Project*

2024

- Developed a Unity multiplayer game with AI and support for more than four concurrent players.
- Independently designed and implemented the networking system using Node.js, socket connections, Google Cloud, and game-state synchronization.

EDUCATION

North Carolina A&T State University

Greensboro, NC

B.S., Computer Science, GPA: 3.79

May 2024

Honors: Dean's List (Fall 2022), Chancellor's List (Fall 2022 and Spring 2023)

AWARDS

A&T Merit Scholarship (\$7,000 annually) | Zynga Scholarship (\$20,000 annually)
